

Creating a Culturally Informed Math Identity Through the Arts

Online Monthly Series on Tuesdays
5:30-7:30 p.m.

October 26, November 16, December 14, January 11,
February 1, March 8, April 12, May 10

This series is designed to explore alternative and culturally relevant materials as tools for supporting children's (ages 3 – 8) positive math identities. We will emphasize visual arts/crafts that have roots within marginalized communities. Through fun, hands-on learning, participants will come to identify exciting ways to teach early math that connect children to their home environment.

Free to PreK, TK and K Educators,
Partners and Participants in P3, MQC and Region 1 HUB
