

Marin County Office of Education

presents

Diabetes in School Settings

Training for school site teams will include an overview of diabetes, the basic signs and symptoms of hypo- and hyper-glycemia, the assessment of non-emergency status and the appropriate response of the school personnel to these diabetic situations.

A hands-on segment will allow school personnel to practice the important skills of glucagon injection, obtaining glucometer blood glucose readings and viewing the contents of the Go- KIT needed for field trips.

- Satisfies annual training requirement
- Offers review for school site teams
- Provides expanded hands-on treatment

October 18, 2016

8:00 - 11:15 a.m. ~OR~ 12:00 - 3:15 p.m.
