

July 18, 2016-November 2, 2016

The Congressional App Challenge is designed to engage student creativity and encourage participation in the Science, Technology, Engineering and Math (STEM) fields.

Middle and High School students residing in the 2nd Congressional District, create an app either as an individual, or a team (consisting of no more than four students). Students must produce a short video explaining the app.

The winning app will be exhibited in the US Capitol.
