marin county hackathon

hack4climate sat 02 may 2020

## **Calling all hackers**

in Marin high schools  
and ambitious middle schoolers

On Saturday 02 May, [MVGATE](#) and Marin County Office of Education will host the Marin County 2020 Hack4Climate Hackathon.

# Hack4Climate

In this day-long celebration of design, problem-solving, and creativity, eighty young problem-solvers in one giant room will use their skills to help build a Marin that's more resilient, safe, healthy, and sustainable.

## TO DO

- Come in a team or come solo, just come. If you want to bring a pre-formed team, start talking with your friends and your teacher or coach. Or come solo and find collaborators here. Signup starts soon.
- Hone your skills. You'll use whatever platform you like and you'll choose the users and their problem to solve.
- Start thinking about users to serve and problems to solve. *Will you build a simple air quality app that's used by 10,000 Marin families? A water level analytical tool that's used by professionals in the county Engineering department? Something else? We'll send suggestions and datasets.*
- Not a hacker? Choose from opportunities for volunteering and helping out, too.
- Read about [the last Hackathon](#) in 2017. ***More details soon.***
