What is Ocean Acidification? Education Workshop

Engage in an inquiry based, 3-dimensional learning experience around the impacts of climate change through the lens of ocean acidification. Participants will use VR technology, hands-on investigations, the Understanding Global Change tool, data sets, and NOAA lesson plans to explore ocean acidification.

Best for teachers of grades 5, 6, 7, 8 and high-school chemistry, marine biology, and environmental education.

Tuesday - May 21, 2019

4pm - 6pm
