

Buck Institute for Aging – Professional Development Opportunity

The MCOE in collaboration with the Buck Institute for Research on Aging are offering an exciting opportunity to Marin County middle school teachers. The goal is to get Marin's school children excited about science, so we are proposing the development of the first ever Buck program to "Train the Trainer" by initiating a focus group of 20 middle school science teachers and a colleague from their site.

There will be an informational meeting regarding this opportunity on September 15th at 3:30 p.m. in the Marin Room at the MCOE to provide interested participants more information.
