

MCOE Operated ADA Funding Entitlement

Traditionally, revenue limit for students in COE-operated special day classes and alternative education ADA have been transferred by the CDE to COEs calculated on the base revenue limit of the student's district of residence. Similarly, under the LCFF, districts are entitled to this same funding albeit under the LCFF formula except that the CDE no longer performs this revenue transfer.

Consistent with the CDE past practice of transferring the revenue generated by ADA served in COE programs, MCOE is replicating the CDE process by calculating each district's LCFF funding entitlement by invoicing districts for the per ADA amount generated for students served in MCOE Alternative Education settings. The SDC ADA is billed after an offsetting revenue from the SELPA FAP and an excess cost bill back, consequently the methodology for invoicing SDC ADA is done under a separate formula.

The matrix linked below identifies the types of ADA subject to the transfer transaction.
