

## Educational Technology Program

### Dixie Elementary School District

Districtwide

Kevin Nguyen

*A program that allows all students, teachers and parents to create, discover, and thrive as 21st Century learners.*

The Dixie School District Educational Technology Program runs like a smooth machine, supporting teachers with hardware and software, modeling and team teaching lessons in the classrooms on a daily basis, configuring all the software with log-in and passwords and engaging all learners in active learning with technology. With each of the team members working in collaboration with district office, principals and teachers, innovative programs get released into our district on a consistent basis, with the general understanding that all this work is for the students!

Kevin Nguyen moves his team along seamlessly and each one responds positively and makes it happen. With the deployment of 1:1 in 3-8th grades and a complete innovative teacher package in each class -- Dixie is ready for the 21st Century.
